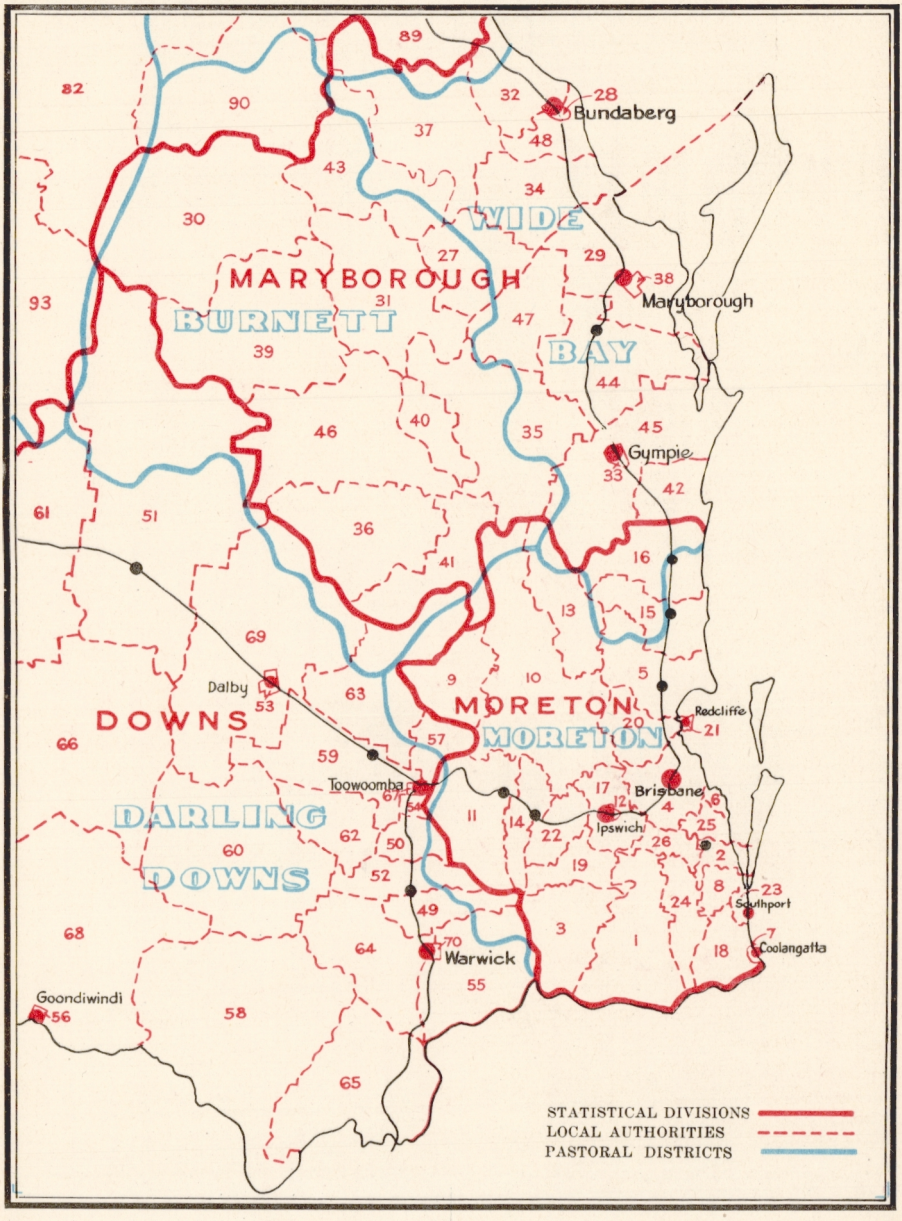
SOUTH-EAST QUEENSLAND



Districts.—All Statistics of Production will in future be compiled in Local Authority Areas and Statistical Divisions based on groups of them. During the year 1939-40 such Districts have been used for manufacturing Statistics only. The Statistical Divisions used to date for Primary Production Statistics are, however, based on groups of Petty Sessions Districts and differ slightly from those based on Local Authority Areas. Fomerly Pastoral Statistics were based on the old Pastoral Districts. For the purposes of historical comparison, Live Stock Numbers have been continued for Pastoral Districts as well as Statistical Divisions.

a Represents the number of separate holdings on which cane was grown for sugar, and, therefore, the figures shown may not be the number of individual cane suppliers to mills, as the crops of several suppliers are sometimes grown on the one holding.

b Exclusive of 4,204 acres cut for green fodder in the State, 3,755 acres of which were in the sugar districts.

(*a*) This is the value of cane delivered to Mill Tramways, &c. The State total includes £248,984 costs of transport, other than on the mills' own tramways, lorries, &c., and farmers' own carting, and levies on cane paid by growers and millers, amounting to £96,413.

(*b*) This value represents net receipts from the Sugar Board, plus costs of sacks not accounted for, plus receipts from local sales of raw sugar. It is the value of the sugar when last handled by the mill employees, as sacks are supplied to mills free of charge; their value, other than the few not accounted for, is excluded from the value of the sugar output. Railage and loading charges are excluded.

(*c*) Value of raw sugar at 94 N.T. loaded on steamers at mill port, less lighterage on No. 1 pool sugar, which is paid by the Board, and is a pool expense. Lighterage on No. 2 pool sugar is a charge against individual mills. All sugar in No. 1 and No. 2 pools is included in this value, but the value of about 520 tons sold locally by the mills and not pooled is excluded.

Sugar Districts.—In all Sugar Tables standard statistical divisions have been slightly altered as follows :—

(1) Although actually in Rockhampton, St. Lawrence Petty Sessions District, being portion of the Mackay Sugar Area, is included in Mackay.

(2) The Mary Valley portion of the Gympie Petty Sessions District is included in Maryborough, the cane from this area having been crushed at Mount Bauple Mill.

(3) The Coastal portion of Gympie District south of the City, though actually in Maryborough, is included in Moreton, the cane from this area having been crushed at Nambour Mill.

In all other Tables, Standard Statistical Divisions are used.

5. MANUFACTURING.

Table No. 67.

SUMMARY OF FACTORY STATISTICS—QUEENSLAND.

(NOTE :—In this table heat, light, and power factories (Class xvi) are included).

Definition of Factory.—A factory for statistical purposes is an industrial establishment in which four or more hands are employed or in which power other than hand or horse is used.

Average Number of Persons Employed.—This information has been compiled in two ways—(*a*) Average number of hands over the whole year ; (*b*) Average number over the period of operation.

Value of Output.—This represents the selling price at the factory of all products manufactured during the year, whether sold or held in stock.

Value of Production.—This figure is arrived at by deducting from the value of output the cost of raw materials, containers, fuel, light, power, oil, water, tools replaced and repairs to buildings and plant. It has been agreed upon by the Australian Statisticians as being the best estimate at present obtainable of the contribution of factories to national wealth production. It is still subject to deductions for depreciation, and for postage, advertising, and similar expenses. Subject to these deductions, it represents the fund which provides wages and salaries, profits, interest, and rent.

a Figures on lines marked thus refer to "Average Number of Hands, &c., employed over whole year," or are dependent upon "Average Hands, &c., over whole year."

b Figures on lines marked thus refer to "Average Number of Hands, &c., over the period during which the factory was in operation."

c Book values, less any depreciation reserve in respect of them, as stated by factory proprietors.

d Comparisons between years should be made with care on account of changed definitions. From 1936-37, horsepower is defined as "rated horsepower of engines ordinarily in use."

e Excluding electric motors (48,952 h.p. in 1939-40) used in factories where the electricity was generated by themselves. The prime movers only are included.

f The amount of depreciation on Buildings, Machinery and Plant as stated on returns was £1,343,859 for 1939-40.

Table No. 13.

TAXATION STATISTICS, 1938-39 INCOME YEAR.

NOTE.—All employees in receipt of incomes over £150 per annum, and all property owners and persons engaged in business whatever their income, are required by Law to make a State income tax return. The following table therefore gives a fairly complete survey of all personal and company incomes for the year 1938-39, with the exception of women and juveniles (about 95,000 in number) and a substantial number of men (farm hands and casual workers) who earn less than £150 per annum.

The figures relate to all incomes *derived from sources in Queensland* rather than the incomes of Queensland residents.

The "number of scholars" refers to net enrolment.

b Prior to 1939 the "number of scholars" refers to aggregate enrolment, net enrolment not being available.

c Grammar Schools are Private Schools, which receive a Government subsidy.

d Prior to 1939 included figures for High School Sections of combined High Schools and Technical Colleges, which were also included in "State Schools." (See also note *a*.) Therefore, the figures for 1939 are not comparable with those shown for previous years.

e Not available.

f Not available, as most of the students are part-time.
